

34 LT ALUMINUM CYLINDER

The 34LT aluminum cylinder is a lightweight, 500psi gas cylinder designed to hold approximately 34 liters of gas such as oxygen, nitrogen, or a wide variety of mixes. Made from durable aluminum, it offers a high strength-to-weight ratio, making it easier to handle and transport compared to steel cylinders. The cylinders have the universal C10 valve as standard and can be filled with both non-reactive and reactive gases.

Characteristic	
Gas Type	Reactive / Non-Reactive
Contents	34 liters
Pressure	35 Bar (500 Psi)
Dimensions	289 mm x 76 mm (11" x 3")
Weight	0.44 kg (1lb)
Material	Aluminum Alloy

Specifications			
Approvals	Fill Type	Valve Inlet	Recommended Equipment
Global	Non-Refillable	5/8"-18 UNF (C10)	Most commonly used regulator is the fixed flow C10 brass or stainless steel
