

# CARRYING CASES

Engineered for durability and convenience, this **hard plastic carrying case** is constructed from impact-resistant materials to ensure maximum safety during transport and storage. Designed with an ergonomic, easy-to-grip handle, it offers effortless portability for field technicians and lab professionals alike.

- **Secure Capacity:** Holds up to two calibration gas cylinders—compatible with 34LT, 58LT, 103LT, or 116LT sizes.
- **On-the-Go Calibration:** Cylinders remain securely in place during calibration, eliminating the need for removal.
- **Built for Safety:** Rugged construction protects contents from physical damage and environmental exposure.
- **Transport-Ready:** Lightweight yet tough, ideal for mobile operations or long-term storage of calibration standards.

Designed for mobility and maximum capacity, this **soft carry case** allows safe transport of up to three calibration gas cylinders and essential equipment. With a built-in shoulder strap, it frees up both hands—ideal for technicians working in elevated or confined spaces.

Whether you're heading into the field or organizing your lab, these cases deliver peace of mind and professional-grade protection.
